# Subject Index

- Adaptive behavior  
  Alternative assessment 38–39  
  Assessment 31  
  Construct 29–31  
  Adaptive behavior score  
    interpretation 35–36  
  Practice guidelines 42–43  
  Relation to intellectual  
    functioning 33–35  
  Respondents 38–39, 43  
  Standardized Adaptive Behavior  
    Scales 31
- Age of onset 32–33  
  See also: Developmental period
- Assessment 99  
  Interpreting adaptive behavior  
    and intellectual functioning  
    scores 35–36  
  Practice guidelines 42–43  
  See also: Adaptive behavior,  
    Intellectual functioning,  
    Support needs
- Assumptions 1, 14–15
- Borderline intellectual disability  
118
- Classification  
  Classification of extent of  
    limitations in adaptive skills  
    52–54  
  Classification of extent of  
    limitations in intellectual  
    functioning 55–57  
  Classification of intensity of  
    support needs 50–52  
  Data driven procedures  
    58–59  
  Explicit framework and  
    systematic process 49–50  
  Practice guidelines 62  
  Role in field of ID 5, 45  
  Subgroup classification  
    categories and bands  
    59–60
- Clinical judgment  
  Role in diagnosis of ID 37–42  
  Role in subgroup classification  
    57–60  
  Role in systems of supports 84
- Clinical judgment standards  
101–102
- Confidence interval 35–36

- Context
- Contextual factors that influence human functioning and personal well-being 108
  - Importance 82–83; 107–109
- Definitional consistence among AAIDD, DSM-5, and ICD-11 15–20
- Developmental period 1, 32–33, 120–121
- See also: Age of onset
- Diagnosis of ID
- Process 5, 23–44
  - Practice guidelines 44
  - Professional responsibility 36
  - Relation between intellectual functioning and adaptive behavior 33–35
  - See also: Clinical judgment
- Diagnostic criteria
- Age of onset 33
  - Significant limitations in adaptive behavior 31
  - Significant limitations in intellectual functioning 29
- Etiology
- Multiple perspectives approach to risk factors 93
- Evidence-based practices 97–101
- Faking/malingering 40–41
- False negatives 40
- False positives 39
- Flynn Effect 42, 123
- Health 103–105
- Holistic framework 91–93
- Human functioning
- Multidimensional model 8–10
  - Dimensions of human functioning 102–109
- Integrative approach to ID
- Overview 6, 87
  - Holistic framework 91–93
  - Precise terminology 93–97
  - Evidence-based practices 97–101
  - Increased understanding of human functioning 101–109
  - Practice guidelines 114
  - Shared vision of valued outcomes 109–111
- Intellectual disability
- Assumptions essential to the application of the definition 1, 14–15
  - Definition 1, 13–14
  - Practice guidelines 20–21
  - Integrative approach: see Integrative approach to ID
  - See also: Diagnostic criteria
- Intellectual functioning 25–26; 28–29
- Practice guidelines 42–43
  - Relation to adaptive behavior 33–35
  - See also: Intelligence
- Intelligence
- Assessment 26
  - IQ score interpretation 35–36
  - Cattell-Horn-Carroll model of intelligence 25–28
  - See also: Intellectual functioning
- International Classification of Diseases, 11th edition (ICD-11) 17

- Mental age 126
- Outcome evaluation
- Guidelines 109–110
  - Human functioning outcomes framework 79–81
  - Valued outcomes associated with theoretical perspectives on ID 110–111
- Participation 105–107
- Personal support plan 78–79
- Practice guidelines
- Assessment of intellectual functioning and adaptive behavior 43
  - Classification in the field of ID 62
  - Defining ID and implementing the definition 21
  - Diagnosis of ID 44
  - Integrative approach to ID 114
  - Systems of supports 85
- Precise terminology
- See Terminology
- Professional responsibility
- In the diagnosis of ID 36–37
  - Regarding an integrative approach to ID 111–113
- Retrospective diagnosis 41–42
- Support needs
- Assessment 67–70
  - Classification 50–52
  - Definition 67
  - Of persons with co-occurring ID and mental health problems 78
  - Of persons with higher IQ 78
- Supports paradigm 64–65
- Systems of supports 6, 63
- Practice guidelines 85
- Systems of supports elements
- Choice and personal autonomy 70–73
  - Inclusive environments 73–74
  - Generic supports 74–75
  - Specialized supports 76–77
- Terminology 93–97
- Theoretical perspectives on intellectual disability 91–93
- Valued outcomes associated with 110
- Valued outcomes
- See Outcome evaluation
